

Truong Nguyen Son Thao

Product Designer/UX-UI Designer

Product-oriented UX/UI Designer with over 3 years of experience building and launching MVPs from research to release.

Specializes in AI, fintech, and digital platforms.

Experienced in cross-department collaboration (PM, Dev, Sales) to translate requirements into feasible product solutions, optimize user experience, and ensure technical viability.

Core Competencies:

Product Thinking

User Research

Collaboration

MVP Strategy

Problem Solving

Experience Timeline:

UX Designer - MVP AI Builder @ StartechAI

AUG 2025 - AUG 2026

Project: Cryptomap360

Product: Global crypto-accepting location platform

Audience: Crypto users, traders, merchants

Role: Product Designer (collaborating with PM & Backend team)

Problem: Users struggle to find crypto-accepting locations; info is scattered and unreliable.

My solution:

- Conducted user research to identify search needs by location, coin type, merchant type
- Designed search flow + advanced filters
- Defined location data structure + integrated backend API
- Designed scalable UI system
- Coordinated with PM and Backend Dev to refine logic before build

Tech: Applied AI to design and build Front-end

- Figma Make
- Antigravity/Claude code/Cursor/Gemini AI
- Github

Results:

- Supported 8,000+ users with 200+ locations
- Reduced location search time by ~40% (internal test estimate)

Portfolio:

tnsthao94.online

Email: tnsthao94@gmail.com

Phone/Zalo: +84 93 292 11 66

Skills

- User Research
- Empathy Map (Job to be Done - JTBD)
- User Interviews (Insight analysis and synthesis)
- User Personas
- Customer Journey Map
- Visual Design
- Communication and Collaboration
- A/B Testing
- Adaptability and Continuous Learning

Tools

Proficient in:

Figma

Figma Make

Adobe Creative Suite (Photoshop, Illustrator, Premiere)

IDE tools supporting Builder such as: Antigravity, VS Code, Codex,...

Collaboration:

- Work directly with PM to clarify requirements & define MVP scope
 - Facilitate discussions between Dev and Business to align product logic
 - Proactively suggest flow improvements based on user feedback
 - Participate in grooming, backlog refinement, sprint planning
 - Monitor product post-release and propose enhancements
-

Project: Bitcoin Nail Bar

Product: Nail salon booking & operations management system

Audience: Customers and salon owners

Role: Product Designer (end-to-end MVP)

Problem: Nail salon operated manually, difficult to manage appointments, customer info, and staff data.

Solution:

Research salon owner & customer needs

Build MVP including:

- Online booking & scheduling
- Customer data management (contacts, history)
- Staff information management
- Mini game Lucky Draw to boost engagement

Design internal Admin management system

Tech: Use AI to design and build MVP

- Front-end: Figma Make
- Back-end: Supabase
- Storage: Cloudinary
- Other services: Resend
- AI Chatbot/API: Deepseek, Alibaba Cloud

Results

MVP deployed and operational

Increased professionalism in managing schedules & customer data

Supported launch in a short timeframe (March 27–28)

Project: Pateso da cóc Cô Tô

Product: Brand landing page + order placement

Audience: Retail customers

Problem: Brand needed a channel to showcase products and quickly receive online orders.

Solution:

Design landing page focused on conversion

Build simple order flow via Telegram

Design Admin page for content management

Collaboration Highlights

- Work directly with PM to define MVP scope
- Collaborate with BA and Dev to align logic & feasibility
- Participate in grooming, sprint planning
- Monitor product after launch
- Proactively suggest improvements based on feedback

Education:

Psychology of UX Design

@ [Uxfoundation.vn](https://uxfoundation.vn)

JUN 2025 - OCT 2025

Learned and practiced skills:

- Heuristic Evaluation
- Usability Testing
- Planning “Hook modal”
- Case study: Redesign Caloer
- Award: Best Team PXD K17

UX Foundation

@ [Uxfoundation.vn](https://uxfoundation.vn)

OCT 2024 - JAN 2025

- Learned and practiced User Experience skills (Empathy Map, Interview, User Personas, Customer Journey Map, Solution Audit, and proposing Solutions)
- Case study: Optimizing Google Calendar for personal work

Advertising Design

@ cusc.ctu.edu.vn

JUN 2019 - JAN 2020

- Studied graphic design tools and thinking.
- Practiced and reported with the team.

Bachelor of Biology

@ Can Tho University

2012 - 2016

Technology: Applying AI to design and build MVP

- Front-end: Figma Make
- Back-end: Supabase
- Storage: Cloudinary
- Other service: TelegramBot (Order management)
- AI Chatbot/API: Deepseek, Alibaba Cloud

Results

- MVP deployed and operational.
- Increased professionalism in order management.
- Launched within 2 weeks from job acceptance.

UX/UI Designer @ StartechAI

NOV 2023 - JUN 2025

Role: UX/UI Designer (Product Collaboration)

Responsibilities:

- Analyze requirements & document features
- Brainstorm solutions with the team
- Design Wireframes & UI focused on performance optimization
- Collaborate with BA & Dev during grooming & implementation
- Monitor product post-production and handle feedback

Key projects:

- VLINKPAY (E-giftcard US Market)
- Crypto flow UX
- Spin Game (Merchant engagement tool)

Freelance Designer @ Talucan (E-commerce)

MAR 2023 - MAR 2024

- POD product design
- Edit & optimize Wordpress website

Jr. Graphic/UX-UI Designer @ 5S Group

JAN 2020 - MAR 2023

- Design banners, marketing materials
- Support analysis and UX/UI design for the WMS (Warehouse Management System) and TMS (Transportation Management System)
- Design the outsourced product "Quick Order" (Retail ordering for Colgate internal use)
- Collaborate with PO to analyze products
- Support other departments as needed
